Neon FlexLED V4

4th Generation FlexLED Neon

Neon FlexLED V4 LED lighting is the perfect replacement for traditional neon lighting. Not only is it easily customizable but it is far more durable than traditional neon. Our V4 neon is slightly larger than our V3 neon at 12MM (0.47") in width and includes solderless IP67-rated connections. It also is available in a horizontal bend or as a vertical bend. 6 different LED versions with endless possibilities for colour and control. RGB, RGBW (2700k or 5600k), colour temperature adjustable 2700k - 5500k, and RGBW pixel control (2700k or 5600k). All versions have the ability to dim from 0 to 100% and can be controlled via any of our constant voltage controllers. (DMX / Rotary Knob Control / Zigbee). The RGBW Pixel control LED can be controlled via any of our pixel controllers.

This product is widely used as a replacement for traditional neon but also as a way to illuminate and decorate locations such as film and television sets, concert touring, restaurants, theatrical spaces, exhibition halls, bars, shopping malls, theme parks, casinos and much more.

Standard NeonFlex V4 has a flat top for viewing at 120 degrees.

IP67 rated makes this the perfect product for indoor or outdoor use. cULus rated, as well as RoHS, and CE compliant making it safe for use anywhere in the world.

Factory lengths of 10 meters (32.81 feet) but customizable every 5 to 10CM (depending on LED type) making it the perfect product for many uses. Utilizing our standard high CRI white LEDs make for beautiful soft white output as well as creating beautiful pastel colours when mixed with the colour LED options.

END CAPS

The bottom of the LED strip has a transparent window. The black marker is the cutting point.

Use a cutting jig or straight-edge, precisely cut on the line in order to ensure no damage to the LED.

When cutting the neon, do not cut on an angle as it will not properly mate with the end caps or connectors.

ASSEMBLY INSTRUCTIONS - WITH CONNECTOR

Insert the shell into the strip as far as possible

Ensure the opening is at the bottom of the strip

Insert the plug into the holes of the LED Neon

Ensure the plug is inset further than the outer shell.

Insert the stopper into the shell.

Ensure the stopper is fully inserted

Put the waterproof washer into the plug

Ensure the washer is pushed to the back

Insert the plug into the led strip and ensure the pins make contact with the LED strip

Assembly should be fully inserted.

Screw the end cap onto the shell with the provided screws.

Completed assembly.
