

Multi-Conductor Cable Service Grade

This multi conductor cable is designed for temporary installations for film and television sets, theatrical locations, concert touring, and anywhere reliable temporary power is required. This service grade cable is a Moss LED exclusive and designed specifically for power transmission of low voltage power. 18AWG provides a superior gauge which prevents line loss (voltage drop) over long distances coupled with a service grade jacket which provides protection for the cable to be installed not just once or twice but many times.

When to use:

- temporary installations
- removal and and re-installation is necessary
- between seasons of shows
- short-run theatrical productions
- concert touring productions
