

SoftFLEX LED 784 RGBW 24V

SoftFlex LED Tape

Industry Standard 2700K, 4100K, and 6000K High CRI >90

Our SoftFLEX (COB) series of flexible LED creates a virtually seamless, diffused, soft output without the ability to see individual pixels unlike our traditional FlexLED strips. The innovative design shows minimal hot spots & dark spots making it ideal in locations where you may be able to see the LED or its reflection. The SoftFLEX 784 RGBW is only 12MM in width which makes it suitable for narrow locations. Using chip-on-board (COB) technology the phosphor coating also acts as the diffuser creating almost pixel-free light output.

The 784 RGBW arranges the Red, Green, Blue & White pixels in a linear format which allows for a narrow 12MM width and at the same time providing convenient solder pads on top of the PCB. For comparison, our SoftFLEX LED 1134 RGB 24V & SoftFLEX LED 1008 Dynamic White (Bi-Colour) 24V arranges the pixels in a parallel format. The two different designs result in a very different visual effect in spite of both being part of the SoftFLEX family.

Reliable, high efficacy and high heat dissipation ensuring a long life-span. Cuttable every 7.14CM (2.81") the SoftFLEX 784 is extremely customizable and is a perfect solution for countless lighting challenges. |

Indoor and weatherproof strips have double-sided tape on the back which makes installation as easy as peel n stick. Waterproof must be mounted using silicone (not provided).

Soldering Guidelines: Soldering iron should be between 360°C and 372°C. Please ensure not to heat each solder pad for longer than 3 seconds otherwise separation of the solder pads can occur.

Controller, power supply and extension cables sold separately. Quantity discounts and custom colour temperatures are available.

Please call 1.800.924.1585 or email info@mossled.com to inquire.

Lead time for custom products are typically 6 - 8 weeks. Please contact us to discuss your project requirements.

INSTALLATION NOTES

Follow all instructions on bag label
 Install indoor product in dry locations only
 Weatherproof is rated at IP67 and Waterproof is rated at IP68.
 Waterproof FlexLED must be mounted using silicone (not provided)
